

Journal of Reproductive Biotechnology and Biomedical Sciences.

Updated by Administrator

Date : 21/02/2024

The Editor of the **Journal of Reproductive Biotechnology and Biomedical Sciences (JRBBBS)** welcome manuscripts in all areas of biomedical sciences and human reproduction including clinical, scientific, nursing, social and legal aspects of health and human fertility. JRBBBS is an open access online journal www.ivf-hub.net

All articles published in the JRBBBS are open access which are disseminated and freely accessible as per the regulations of the Creative Commons Attribution pertaining to the (CC BY 4.0) license (<http://creativecommons.org/licenses/by/4.0/>). The authors retain the copyright and full publishing rights without restrictions but must conform to the provisions of the Creative Commons Attribution pertaining to the (CC BY 4.0) license code of conduct (<http://creativecommons.org/licenses/by/4.0/>).

Submitted manuscripts will be considered for publication under the condition they are not being submitted to another journal at the same time and have not been published or accepted by another Journal. Full papers can be accepted for republication if permission was obtained from the original publisher prior to submission of the article to this journal.

Each issue may contain some or all of the following:

- Full length original papers
- Reviews
- Commentaries
- Opinions
- Letters to the Editor
- Short communications
- Interesting Observations/Findings [This could be a 200 to 1000 words document]
- Recent abstracts from other journals
- Book reviews.

The authors retain the copyright and full publishing rights without restrictions but must conform to the provisions of Creative Commons Attribution pertaining to the (CC BY 4.0) license code of conduct (<http://creativecommons.org/licenses/by/4.0/>).

Electronic submission of manuscripts in point 12 Arial fonts in MS Word format is the only mode of submission accepted at this time. Manuscripts must be submitted electronically to: jrbf.online@gmail.com with a cc to: jaffarali.abdullah@gmail.com

Preparation of Manuscripts

Manuscripts must adhere to American spelling. The manuscript is prepared as per the ICMJE guidelines with a modification pertaining to the reference citation format only. For detailed guidelines please refer to: (<http://www.icmje.org/index.html#manuscript>). A brief instruction for the authors is given below. Individual components of the manuscript should begin on a new page, in the following sequence:

1. Title page
2. Abstract
3. Text (Introduction, Materials and Methods, Results, Discussion)
4. Acknowledgements
5. References
6. Tables
7. Illustrations

Submitted manuscript should be accompanied by an electronic covering letter from the author that will be responsible for correspondence regarding the manuscript. This letter must carry the following declaration or statements:

(i) That the study has been approved by competent authorities such as the Institutional Review Board (IRB)

(ii) That studies involving human subjects was performed following written patient informed consent and in compliance to the World Medical Association Declaration of Helsinki.

(iii) That animal studies were approved by competent authorities and that the animal experiments were performed humanely with minimal pain and distress to the animals.

(iv) On conflict of interests (financial and any other commercial interests or gifts received; including sources of financial and material support, and commercial affiliations must be declared).

(v) Another statement indicating the manuscript has been seen and approved by all the authors need also be included.

(vi) The individual author's contributions and the proportion of the contribution in relation to the overall content of manuscript may also be mentioned at the discretion of the authors.

(vii) Finally a statement indicating permission has been sought from individual(s) if their name(s) was mentioned in the **Acknowledgement** section or anywhere in the text of the manuscript must be included.

vii. Authors are responsible for all submissions and must retain copies of everything submitted. The publisher shall not be held responsible for human or computer errors resulting in loss of manuscripts during transmission, accidental erasure or was irrecoverable or irretrievable due to computer failure.

viii. Authors are required to provide in their cover letter the names, email addresses and contact details of at least five reviewers.

Language requirement: The manuscript must be prepared in English using American spelling. Authors that are not natives of English must arrange to have their manuscripts edited / copy-edited by the Australian Editorial Services (web: www.nativeenglisheditor.com) or a native English speaker prior to submission. The JRBBS has contracted and obtained a 20%

discount from the Australian Editorial Services (web: www.nativeenglisheditor.com) for authors of countries from middle and lower income economies. The authors have to obtain a discount code from the Editor's office if they wish to avail of the discount. If you wish to avail of the discount code email us at: jrbf.online@gmail.com with a cc : jaffarali.abdullah@gmail.com

Manuscripts should be typed double spaced with 3.17cm left/right and 2.54cm top/bottom margins.

Title page

The title page must be prepared in the following sequence:

1. The title of the article must be short but sufficiently informative.
2. Names of authors (in full and their email addresses).
3. Name and address of department(s) and/or institution(s) at which the work was carried out.
4. Name, address and email address of author to whom correspondence should be addressed.
5. Sources of support
6. Other declarations or statements (eg: whether the paper was previously presented in part or full at a scientific meeting if so name of organizers/meeting and dates)

Abstract

The second page should carry an abstract of not more than 300 words. The abstract should state the purposes of the study, basic procedures, core findings and conclusions. Emphasize new and important aspects of the study or observations. Reference to other publications should be avoided.

Text

The text may be divided into sections with the headings:

Introduction,
Materials and Methods (or Subjects and Methods),
Results,
Discussion,
Conclusion and,
Acknowledgment

Subheadings are allowed for long papers.

Introduction:

Briefly review the literature indicating the chronological events that lead to the current the state of the art. In this section the purpose of the study should be clearly stated. This shall be followed by the rationale of the study which should be summarized with pertinent references. Do not review extensively.

Materials and Methods:

Describe the rationale for the selection of study subjects (human or experimental animals). The methods employed must be described in detail giving references for documented methods. Laboratory or clinical consumables, paraphernalia, chemicals, reagents, culture media, etc. used in the study must be described succinctly giving manufacturer's name and address.

Results:

Results should be presented in the same chronological sequence as that described for the various experiments or investigations under the methods section above. Repetition in the text of all the data already presented in tables and/or illustrations must be avoided. Do not discuss the results in this section.

Discussion:

Discuss and stress new and crucial findings. Compare or relate your findings to previous observations, if any. Refrain from making unqualified statements not supported by your data or findings.

Conclusion:

In this section provide the main and crucial findings of the study in brief. It should not exceed seven sentences or do not exceed 80 words.

Reference Format:

The surname of the author(s) and year of publication should be used when citing previous studies in the manuscript.

1. **Single author:** Author's surname without initials followed by year of publication.
2. **Two authors:** Both authors' surnames without initials and year of publication
3. **Three or more authors:** First author's surname without initials followed by "*et al.*" and then the year of publication.

Adhere to the examples given below.

(i) Vitrification was estimated to be cheaper than slow cooling (Ali, 1992).

(ii) Ali and Shelton performed an extensive and systematic investigation involving over 6,000 permutations and combinations of cryoprotectant solutions to identify the least toxic and most efficacious vitrification solution that consisted of 5.5M ethylene glycol and 1M sucrose (Ali and Shelton, 1993).

(iii) Ethylene glycol was reported to be least embryotoxic (Ali and Shelton, 1993).

(iii) The human embryo was successfully vitrified for the first time in 1995 with survival of all embryos and no loss of viability during subsequent development in vitro up to the blastocyst stage (Ali et al., 1995; Ali, 1996).

(iv) Previous reports (Ali, 1992; Ali and Shelton, 1993; Ali et al., 1993).....

Acknowledgement:

In this section acknowledge only those that have made significant contributions to your study. The nature of the acknowledged person's contribution must be mentioned. Acknowledged persons must sign a letter indicating their acceptance to being mentioned in this section.

References:

Organize references in the Reference section in alphabetical order. All authors must be named.

Follow the correct format for citing references as given in the examples below:

A. Journal Article

i. Single author

Ali J. Developmental competence of unipronuclear and triploid day-2 human embryos after vitrification with VS14. Med. Sci. Res. (UK) 1996;24:377-378

ii. Two authors

Ali J, Shelton JN. Design of vitrification solutions for the cryopreservation of embryos. J Reprod Fertil. 1993;99(2):471-477.

iii. Three or more than three authors

Ali J, Bongso A, Ratnam SS. Chromosomal analysis of day-2 human embryos vitrified with VS14. Med. Sci. Res.(UK) 1995;23:539-540

B. Journal supplements

Coskun S, Qubbaj W, Al-Kabra M, Awartani K, Al-Rejjal R, Al-Hassan S. Multiple displacement amplification efficiency could be improved by removing 2 blastomeres during preimplantation genetic diagnosis. Fertil Steril. 2008; 90(Suppl 1):S302-S303.

1. Book chapters

Ali J, Shelton JN. Development of vitrification solutions. In: Tucker M, Liebermann J, Eds. Vitrification in assisted reproduction. A user's manual and troubleshooting guide. U K : Informa Healthcare Medical Books, 2 0 0 7; 45-63

1. Letters

Ali J. Source of vitrification solutions [letter]. Fertil Steril. 2001; 76: 214-215

1. In Press

Ali J. In vitro maturation of immature oocytes in stimulated cycles. Fertil Steril. In press.

Abbreviations:

Only standard abbreviations of journals should be used. Please refer to ICMJE guidelines

Tables and Illustrations or Figures:

Each table should be submitted on a separate page and numbered using Arabic numerals consecutively in order of their appearance. Non-standard abbreviations used in tables and illustrations should be explained in footnotes. Figures shall also be numbered in Arabic numerals in the consecutive order of their appearance in the text.

Reprints

Reprints will not be provided to authors however authors may purchase the same from the editorial office. Email the Editor for further details. Email address: jrbf.online@gmail.com with a cc : jaffarali.abdullah@gmail.com

Peer Review Protocol

The author(s) are informed reviewers chosen to review manuscripts shall be required to declare conflicts of interest. Authors may provide the names and email addresses of “4” to “5” reviewers that are qualified to review their manuscript so as to facilitate and expedite the peer review process.

Disclaimer

The Journal of Reproductive Biotechnology and Biomedical Sciences (JRBBS) shall not be held liable or responsible for any statement made by authors or advertisers. The same rule shall apply to any objection raised due to the use of a person's name in the manuscript or for that matter to any objection raised against anything printed in this journal. Plagiarism is not permitted by the JRBBS. It is the responsibility of authors and advertisers to accept liability/responsibility for their statements and writings.

ARTICLE PROCESSING / PUBLICATION CHARGE (APC)

Updated by Administrator

Date : 24 February 2024

There is no article processing charge (APC) for authors of low, middle income economies/countries and self-funded authors of high economies and advanced nations with effect from 15 October 2021 until further notice. It is now FREE to publish in the JRBBS. However authors including students that have access to institutional publication support or budget for publication are required to pay the APC. Please see chart below for details on the APC.

Article Processing Charge (APC) - only for authors that have access to institutional publication funding support	
Nos. of pages	Cost in US\$
1	\$200
2	\$300
3	\$400
4	\$500
5	\$600
6	\$700
7	\$800
Additional pages @ \$50 per page	
Government tax is 8% but may change without notice	

Government tax: Prices listed above excludes 8% Government SST (subject to change without notice). Invoice shall be issued after manuscript has been accepted for publication.

*APC for additional pages from page 8 onwards shall be calculated at US\$50 per page.

OPEN ACCESS

The JRBBS is open access. There is no cost involved for accessing articles.
